

Model E2850D Water Conditioning System

Designed for Homeowners needing a higher gallon per minute flow rate. This system provides a 30 gallon per minute flow rate.

Exclusive System Features

- Ideal for large homes and commercial applications
- Fully adjustable 5-cycle control delivers controlled upflow backwash, downflow brining and slow rinse, rapid rinse, timed brine refill and downflow service
- Time tested, hydraulically balanced piston, seal and spacer design to pilot service flow and regeneration
- Backwash capacity handles tanks up to 30" diameter and flow rates up to 50 G.P.M.
- 30 G.P.M. flow rate with 16" x 65" resin tank; 128,000 grains
- Consistent brining regardless of salt levels with timed brine refills
- Choice of demand brass meter or time clock regeneration
- Carbon cap reduces chlorine levels
